

# Prenatal care and syphilis resource guide

This resource guide lists federally qualified health centers and local health departments in Utah that offer prenatal care and/or syphilis testing and treatment. Learn more about syphilis during pregnancy [here](#). Every effort has been made to make sure all of the information listed is correct, but it could change. Make sure you confirm the services offered and costs directly with a clinic before you seek care.

DHHS has a treatment access program for those who can't afford or access the medicine used to treat syphilis during pregnancy. If you have trouble getting treatment, tell your provider about this program. More information can be found at this [link](#).

## **Bear River health district (Box Elder, Cache, and Rich counties)**

### **Bear River Health Department**
