Joseph K. Miner, MD, MSPH
Executive Director

Division of Disease Control and Prevention
Heather Borski
Division Director

Division of Disease Control and Prevention
Robyn M. Atkinson-Dunn, Ph.D, HCLD
Director, Utah Public Health Laboratory

Date: September 12, 2019

Subject: New Fee for Zika IgM

Zika IgM collection sites:

Beginning October 1, 2019, Utah Public Health Laboratory (UPHL) will charge \$45 for Zika IgM testing.

Due to the expiration of the Emergency Use Authorization (EUA) CDC Zika IgM assay, UPHL is switching to the FDA-approved InBios Assay for Zika IgM testing. The \$45 fee covers the cost of performing this new test.

The requirement for Zika IgM testing approval is no longer required. However, Bureau of Epidemiology approval is still required for the Triplex PCR (Zika, Dengue, Chikungunya virus).

Please contact UPHL Arbovirus Laboratory at 801-965-2561 or Utah Department of Health, Epidemiology, at 801-538-6191 with any questions.
